

Anticorruption policy for the project:

Goal: The organisation and the individual participants in the project will be able to fight corruption and nepotism of all kinds

In general:

- We shall live as we preach transparent and accountable without any discrimination what so ever.
- To fight it we have to look out for it everywhere, and talk about it as soon as a risk occurs.

Specifically:

- We will elect one person especially responsible for documentation of all suspicions of corruption and how they are handled. This person has to be known by all participants in the project so they know who they shall talk to if something seems suspicious or happens.
- Participants will be elected for different tasks in the project by merits to meet the project goals, and not by family, friendship, tribe, party affiliation or religion.

Activities

- We will document all activities and who participate in what, so that we can use statistics to learn and to show everything in a transparent way. And be able to check that we follow the plan and report the project properly.

Economy

- Every transaction needs a verification signed by one in the project leading group, showing: who has paid and who has been paid for what, when, participants and how much. See also document on project homepage <http://womenforchange.nu/project-documents/administration/Verification> in booking for UFWC.
- All withdrawals from bank must be signed by the two elected signatories and be documented for what.

Equipment or facilities

- One person will be especially responsible for equipment and booking of facilities. She will have a list of all equipment and where it is or who is using them and when they return it.
- After the project, all equipment will belong to the organisation, Sololo Tabokoto kankilling kafoo. (Hopefully the organisation can use it in future project as well)
